Supervisor Wunsch,

Flock Safety completed their study and recommend six cameras to cover traffic coming and going from Peninsula Township. Additional cameras would obviously cover more of the township, but the six that are recommended will do what we talked about. To implement the six recommended cameras, I believe the cost would be \$17,100. This would cover the \$2500 annual lease and \$350 initial setup costs for each camera.

Please let me know what you would like from us as far as any type of proposal for the board to consider from Flock Safety and GTSO, or what the proper next step would be for consideration. Thank you so much for your time.
